DRAFT

API's **TrimWal** series is a versatile product line that can transform any area into a unique and appealing space. And the applications for **TrimWal** are virtually endless. **TrimWal** can be used as base moldings, chair rails, crowns and bumpers on ceilings, walls, soffits, columns and more!

TrimWal extrusions snap on quickly and easily and have no exposed fasteners. Simply secure the base to a surface and then snap the trim of your choice over the base. It's that easy! Use **TrimWal** and GlasWal products with matching colors and finishes to maintain a consistent look throughout your project. Or combine a variety of products in distinctive color and shape variations to create compelling and delightful spaces.

TrimWal is available in hundreds of colors, finishes, and shapes, not all of which are displayed in our catalog. If you don't see exactly what you need, just call us. If we don't offer it, we can work with you to create **TrimWal** precisely for your application. Because **TrimWal** is purely decorative, custom extruding options are practically limitless. So, if you have a concept for a custom shape or need inspiration, just complete the Specialty Design Form to share your ideas with us…

And let API turn your ideas into reality!
